Day 02 - Task

APTITUDE (Profit & Loss)

1) A shopkeeper buys a book for ₹400 and sells it for ₹480. Find the profit percentage.

Sol:- CP = 400

SP = 480

$$\text{Profit \%} = \frac{SP - CP}{CP} \times 100$$

$$= \frac{480 - 400}{400} \times 100$$

$$= \frac{80}{400} \times 100$$

Profit => $\boxed{= 20\%}$ → Answer.

2) A man buys a watch for ₹1500 and sells it for ₹1200. Find the Loss percentage

Sol:-

CP = 1500

SP = ₹1200

$$\text{Loss \%} = \frac{SP - CP}{CP} \times 100$$

$$= \frac{1200 - 1500}{1500} \times 100$$

$$= \frac{300}{1500} \times 100$$

= 20% Loss

$\boxed{\Rightarrow 20\% \text{ LOSS}}$

$\frac{15 \times 200}{100}$

30

300

Ques 3:

A trader marks a product 20% above the cost price and gives a 10% discount. Assume CP as a 100

Sol:- marked price = 20%.

$MP = \cancel{100}$ 20% ⇒ ₹120

$MP = 100 + 20\% \Rightarrow$ ₹120

$\cancel{MP \Rightarrow 100 + (20\%/100) \Rightarrow 100}$

$= ₹120$.

$S.P = MP - Discount$

$= 120 - 12 \Rightarrow ₹108$

$$\text{profit} = \frac{SP - C.P}{100} \times 100$$

$$= \frac{108 - 100}{100} \times 100 \quad \frac{8}{\cancel{100}} \times \cancel{100}$$

$\Rightarrow 8$

$\boxed{\text{profit\%} \Rightarrow 8\%}$

Ques 4:

If the cost price of 5 pens is ₹100, what is the selling price of each pen to make 25% profit?

Sol:-

cost of 5 pens = 100

CP of 1 pens = $\cancel{100}^{25} / \cancel{5}_1$ 1 pen ⇒ ₹25

$= ₹25$

Profit = 25% of 20

$= \frac{25}{\cancel{100}} \times \cancel{20}$

$= \cancel{25}^{5} / \cancel{5}_1$

$\Rightarrow 5$

S.P = 20+5

= ₹25 → each pen.

$\boxed{₹25}$ → Answer.

Question 5:

A product is sold for ₹900 with a 10% loss. Find the cost price.

Sol:-

S.P = 900

100% - 10% ⇒ 90%

Loss = 10%

SP = 90% of CP

⇒ $900 = \left(\frac{90}{100}\right) \times CP$

$CP = 900 \times (100/90)$

$= \frac{90,000}{90}$

$\boxed{1,000}$ ⇒ Answer

Block 2 - Verbal Ability

1) Reading Passage:

1) what technologies are influencing software development?

Cloud computing and AI are influencing software development.

2) why are scalable systems important?

Scalable systems are important, because they can handle millions of users simultaneously.

3) what does "Scalable" mean in software systems?

"Scalable" means a system can grow and handle more users simultaneously without any issues.

Grammar Correction:

1) He don't like programming

Ans: He doesn't like programming

2) She have submitted the assignment.

She had submitted the assignment

3) They was discussing the project.

They were discussing the project.

Block - 3 Communication Practice.

I have done a project named Course Enrollment System. In this project, my role was frontend development and its is a group project.

In this project, we used the Technologies MERN stack.

Our project work like, the admin can manages instrutors and students, while student can enroll and unenroll courses. The admin assigns subject to instructors, and instructors provides the notes to students.
